

# Crane Installer

## *apprentice*

### About this position

We are looking for an individual to join our team and become a Crane Installer. The candidate must be willing and able to learn, have good self-discipline, and be able to work well with others. Our ideal candidate should be able to communicate clearly, read a tape measure, work from heights, and possess the skill or ability to perform Ironwork or Structural Welding. In addition, the candidate should have a mechanical acumen for the assembly of components. Experience and certifications in operating forklifts, aerial lifts, heavy machinery, rigging, welding and/or supervising is a plus.

### Job Duties and Responsibilities

- Read and understand blueprints and project layout
- Measure, layout and install to exact specifications
- Use of lasers and other means of measuring tools
- Follow direction and clearly communicate with others
- Use of hand tools for bolting and connecting members
- Properly install bolting hardware per industry standard practice or prescribed specifications
- Install or fabricate metal pieces into columns, girders, or other structural frameworks
- Repair or replace existing steel parts of buildings and other structures
- Ensure proper alignment of pieces and components installed
- Rig onto components and steel members following proper rigging techniques
- Operate forklifts, aerial lift, and other machinery to accomplish tasks
- Signal operators of forklifts and cranes for positioning of components and steel members
- Clean and maintain all tools and equipment to ensure they remain in good condition
- Follow all industry and governmental regulations on safety protocols
