

Crane Installer

Experienced

About this position

We are looking for an experienced and reliable Overhead Crane Installer to join our team. The candidate must be able to interpret blueprints and collaborate with others on the job to ensure a mutual understanding of project scope and responsibilities. Our ideal candidate can measure, layout, connect, and fit to specifications, checking that it matches the design plans for install or modification. In addition, the candidate should have a strong mechanical ability for the assembly and repair of overhead cranes. Experience and certifications in operating forklifts, aerial lifts, and other heavy machinery along with rigging. Experience in welding and/or supervising is a plus.

Job Duties and Responsibilities

- Read and understand blueprints and project layout
- Measure, layout and install to exact specifications
- Use of lasers and other means of measuring tools
- Follow direction and clearly communicate with others
- Use of hand tools for bolting and connecting members
- Properly install bolting hardware per industry standard practice or prescribed specifications
- Install or fabricate metal pieces into columns, girders, or other structural frameworks
- Repair or replace existing steel parts of buildings and other structures
- Ensure proper alignment of pieces and components installed
- Rig onto components and steel members following proper rigging techniques
- Operate forklifts, aerial lift, and other machinery to accomplish tasks
- Signal operators of forklifts and cranes for positioning of components and steel members
- Clean and maintain all tools and equipment to ensure they remain in good condition
- Follow all industry and governmental regulations on safety protocols
